

KENNON DOOR 2.0

Kennon created the first SSPD in 2009. Today, with tens of thousands of installations, our door remains the industry leader.

The Kennon Door 2.0 ligature-resistant ensuite safety door for behavioral health units. The virtually indestructible Door 2.0 enables patients to maintain their privacy and dignity while protecting them from harming themselves. It's 100% made in the USA from flexible, water-resistant materials, featuring a breakaway magnetic hinge. Nothing to install – attaching it to your metal door frame is a snap. It's perfect for bathroom and shower installations.

“Our behavioral health suites have been transformed not only into a safer environment, but those that offer calm and comforting images. The spaces that were once dull now offer beautiful imagery during often dark times for our patients.”

What they say...

“Fourteen years ago, I was a co-inventor of the Kennon SSPD Door. The primary feature of the door was it eliminated a main ligature point in the bedroom/bathroom area. I genuinely feel we have improved the quality of life for patients and saved lives. Kennon has spent substantial time and resources making the door better and safer for our patients. Any bit of dignity we can give patients when they are at their lowest point is a huge step to helping them get better, and I feel the Kennon doors do this.”

Lisa Garstad
Privacy/FOIA Officer, former Patient Safety Manager
Veterans Affairs Health Care System

“The art has been a wonderful addition to our program and has clearly helped to reduce the institutional feel that can be difficult to overcome in a hospital. Patients and visitors have commented that the pictures are beautiful and make the units feel more calming and therapeutic. In addition, the quality and durability of the product exceeded our expectations.”

Scott Willoughby, Ph.D., Licensed Clinical Psychologist
Program Director, South Mississippi State Hospital
